Event Overview

Event name

The 9th Conference of East Asia Research Association for Agricultural Heritage Systems (ERAHS)

Date

September 17th (Wednesday) to 20th (Saturday), 2025

Place

Jeju Oriental Hotel and Jeju Island Area

Topic

Sustainable Conservation of IAHS and Restoration of Community

Scale

About 250 people (central ministries, local governments, related experts, etc. related to Korea-China-Japan agricultural heritage)

Language

Korean-English, Korea-Chinese, Korean-Japanese
(Flitto AI Simultaneous Interpretation System)

Host

Jeju Special Self-Governing Province, East Asia Research Association for Agricultural Heritage Systems(ERAHS) and Korean Rural Heritage Association (KRHA)

Organizer

Jeju Tourism Organization

Co-Hosts

IGSNRR, CAS (Institute of Geographic Sciences and Natural Resources Research, Chinese Academy of Sciences)
AHSB-CAASS (Agricultural Heritage Systems Branch of the China Association of Agricultural Science Societies)
J-GIAHS (Japanese GIAHS Network)

Sponsors

Ministry of Agriculture, Food and Rural Affairs, Ministry of Oceans and Fisheries, Korea
Rural Community Corporation

ERAHS
The 9th JEJU

Welcome Message

Young Hun Oh
Governor of Jeju
Special Self-
Governing Province

Distinguished members of the East Asia Agricultural Heritage Association (ERAHS), and honored participants from Korea, China, and Japan,

It is my great pleasure to extend my heartfelt congratulations on the opening of the 9th Conference of ERAHS, and to warmly welcome you all to Jeju from across the East Asian region.

This year's conference is being held under the theme, "Sustainable Conservation of IAHS and Restoration of Community."

It is a meaningful opportunity to reaffirm the value of traditional agricultural and fisheries systems that have been passed down through generations, and to explore ways to preserve these heritages while revitalizing local communities.

Jeju is blessed with pristine nature and a wealth of agricultural and fisheries traditions that embody the wisdom of our ancestors.

In particular, Jeju is recognized by the Food and Agriculture Organization of the United Nations (FAO) for both a Globally Important Agricultural Heritage System — Jeju Batdam(stone-walled fields) — and a Globally Important Fisheries Heritage — Jeju Haenyeo(women divers).

The agricultural and fisheries heritage of East Asia is more than a means of livelihood; it represents the preservation of biodiversity, the resilience of communities, and the essence of cultural identity.

The Jeju Provincial Government is committed to passing down this rich heritage, while fostering a sustainable rural future through creative ideas that bring together people of all generations.

Together with all of you, we will continue to share the value of agricultural and fisheries heritage with the world, and unite our wisdom for a sustainable future.

I sincerely hope that this conference will be a resounding success and serve as a significant milestone for a new leap forward in East Asia's agricultural and fisheries heritage.

Thank you. 

This message has been prepared in collaboration with generative AI as part of Jeju Province's Digital Transformation Policy.

Welcome Message

Won-keun Yoon
Chairman of ERAHS Korea

It is my great honor and pleasure to welcome you to the 2025 East Asia Research Association for Agricultural Heritage Systems (ERAHS) Conference. I sincerely thank you for joining us here today.

Since its start in China in 2014, the ERAHS Conference has been held annually in rotation by China, Japan, and Korea. It has served as a meaningful platform for international cooperation, where we have come together to discuss the value of agricultural and fisheries heritage system and explore pathways for their sustainable development.

Following the last conference in Hadong, Korea in 2019, the conference was unfortunately suspended for three years due to the COVID-19 pandemic. This 9th ERAHS Conference, being held in Korea once again after six years, carries a particularly special significance for all of us.

This year also marks the final year of the initial cycle in which each of the three participating countries has hosted the conference three times. It is a significant moment to reflect on our past achievements and to envision a new phase for ERAHS, one that takes us toward deeper cooperation and greater international recognition of our shared agricultural and fisheries heritage.

This year's host, Jeju, is a truly unique place. It is the region to hold both a designated agricultural heritage system and a fisheries heritage system. With its outstanding natural environment, Jeju also embodies the living spirit of traditional knowledge and strong community values passed down over generations. The theme of this year's conference, "Sustainable Conservation of Important Agricultural-fisheries Heritage System and Restoration of Community," is deeply aligned with Jeju's identity and significance.

We hope this invaluable gathering will allow us to collectively consider the present and future of East Asia's agricultural and fisheries heritage, and to shape sustainable models that harmonize local communities, ecosystems, and traditional knowledge.

I hope your time in Jeju will be both enriching and memorable.

Thank you.

Jeju Stone Park

Jeju Stone Park is a museum and ecological park that shows the “birthplace of stones,” Jeju Island, and systematic stone culture. It is vast enough to display every type of the stone statues of Jeju Island. The entire park is built under the theme of Seolmundae Halmang and the Obaek (500) Generals, the two foundation myths of Jeju Island, so it is a representative place with all the elements of Jeju Stone culture that coexist with stone.

Jeju Haenyeo Museum

Exhibitions on marine, fishing villages, folklore, and fishing areas centered on Jeju's haenyeo culture, which has a long history from its origins. All the exhibits inside and outside the museum are donated by haenyeo, and an actual haenyeo house has been donated to the exhibition hall. Details of food culture, nurturing, half-fishing and half farming, and yeongdeungpogut culture are all displayed. Here is a representative exhibition space of haenyeo culture, which symbolizes the strength of Jeju women.

Jilgraenge Center

Founded and operated by the Sehwa Village Cooperative in Gujwa-eup, Jeju-si (477 residents), it is a representative Jeju-type complex cultural space that finds local cultural color and develops solidarity among residents. It operates a travel center, bakery cafe, local food sales, accommodation, and operation. Representative sustainable rural tourism village selected by the United Nations World Tourism Organization. (UNWTO)

Sumbisori Trail

This is a field wall path where you can feel the life of Jeju haenyeo, which was built around the Haenyeo Museum, and it is called 'Hadori Field Damgil' and 'Breathing-sound Trail'. The haenyeo exhales the air they have held, enduring while working under water, and the sound is called sumbisori. In past years the haenyeo of Jeju maintained their lives by farming in addition to diving, and the road that the haenyeo passed back and forth between diving and field work is called the Sumbisori Trail.

Jeju Donghwa Village (Jesco Mart)

Jeju Donghwa Village is an eco-friendly park located at the center of Oreum Valley in the eastern part of Jeju. It maintains the alignment of the surrounding Oreum Ridge and continuity of the landscape, an open park designed under the theme of Jeju's trees, Jeju's stones, Jeju's culture and people, and flowers from all seasons. It also features a shopping mall linked to “6th Industry.”

Field Trip Route

General Information on Jeju Special Self-Governing Province

Weather information

Lowest 24.3°C / Highest 30.8°C / Average 27.6°C
(Average temperatures in Jeju City on September 18–19 over the previous three years)

Voltage

The standard voltage in Korea is 220v. with a frequency of 60Hz. (Devices for 100v. or 110v. require a separate voltage converter.)

Duty-free shops

- Duty-free allowance per person, per entry: \$800 USD (Up to 6 times per year)
- Alcohol: Up to 2 bottles per person (max. 2 L, under \$400 USD)
- Cigarettes: 1 carton per person
- Perfume: 100 ml per person (Alcohol, cigarette, and perfume limits are not included in the \$800 USD duty-free allowance.)

Emergency calls

Medical Emergencies or Fire: Dial 119
Safety & Police Assistance: Dial 112
Jeju Safety Call Center: +82-64-710-1911
(24-hour multilingual support for accidents and other emergencies)

Conference Interpretation

Flitto System / Halla Hall (Opening & Closing Ceremony, session 2, 4, 6)

- AI-based real-time simultaneous interpretation system
- High-quality data construction and AI simultaneous interpretation system for language, artificial function LLM learning based on 14 million global user platforms worldwide

Real-time interpretation process (delay 0 to 2 seconds)

- Microphone → Field Console → Flitto Server → Field Console (app) → Personal Devices (receivers, mobile phones, pads, laptops, etc.)

User Supplies

- Basic: Receiver (received and signed at the entrance), select channels by language / Voice only
- Caption: QR access using personal devices (smart phone, tablet, laptop, etc.) and language selection
(If you add a voice from the app, use a personal earphone instead of a receiver.)

Meals for registered participants (provided)

September 18	Lunch (B1 Restaurant)
	Welcome Dinner (Halla Hall)
September 19	Lunch before the field trip(by groups), two pre-ordered menus offered
	Dinner after the field trip (networking dinner for all participants) 1 or 2 restaurants (group menu)

Restaurant Information near the Hotel

1	Cargo Cruise / Vegan Focus	Fusion
2	Bulkkang / grilled meat	Korean cuisine
3	TopDong kyungyine / Braised hairtail, etc.	Korean cuisine
4	Seokchon Restaurant / Abalone, seafood base	Korean cuisine
5	Noryangjin / seafood, fish, sashimi	Sashimi restaurant

6	Neulsodam /Horned Turban, Abalone, bracken fern base	Native food
7	Halla Pork Cutlet / Pork Cutlet	Western food
8	Honbatti Noodles	Noodles
9	Hwajin Abalone / Abalone base	Korean cuisine
10	Café Annes / yogurt, coffee, etc.	Dessert

Hand-made agricultural heritage Jeju Batdam

-FAO Globally Important Agricultural Heritage, Jeju Batdam Agricultural System-

The southernmost volcanic island off the Korean Peninsula, Jeju Island. Its topography, geology, and climate characteristics are the harsh agricultural environment of the island itself. However, **the islanders built more than 22,000 km of Batdam by hand using stones picked and dug from the soil.** The Jeju Batdam, which was created in this way, protects crops by preventing wind and soil loss, as well as representing the aesthetics of Jeju Island with its outstanding agricultural and cultural landscape. It has been part of the agriculture of Jeju Island for more than 1,000 years, enduring numerous challenges such as farmland reorganization and the spread of urbanization. **In addition, as the Jeju Batdam Agricultural System has been registered as a Globally Important Agricultural Heritage System, it is increasing the sustainability of Jeju agriculture by promoting the preservation and utilization of Batdam.**

Name of Heritage: Jeju Batdam Agricultural System

Location: Dry-field farming areas of Jeju Special Self-Governing Province

Designation Dates

Nationally Important Agricultural Heritage System: January 25, 2013

Globally Important Agricultural Heritage System: April 1, 2014

Jeju Batdam Agricultural System

Batdam that lasted a thousand years

The will and wisdom of the Jeju people are contained in the batdam. Batdam are the product of the will to ease the cultivation of stony land together with the wisdom to overcome the barren, windy environment through the use of stones piled up using carefully correct engagement of large and small stones to prevent them from being blown over. Chinks between the rocks cut up the wind stream and soften it. It is the secret of these Batdam, for centuries standing firm against powerful winds.

Various types of Batdam

The shape of the Jeju Batdam varies greatly because they are properly built according to the characteristics of the places they are located. The general form is 'oeidam(outer walls)', and various forms are extant, such as jeopdam or jatdam in places where there are a great many stones, as well as japgubdam in sloping areas too.

oeidam

japgubdam

jatdam/jatgil

Japgupdam

Heukryongman-ri Embroidered Jeju Island

As Batdam began to accumulate and over a very long period, Jeju Island became a mosaic embroidered with Batdam. They make up more than 22,000 km, a distance more than half-way around the earth! That's why the Jeju Batdam are called “Heukryongman-ri.” The name was given because the black basalt walls continue relentlessly, and the meandering flow resembles heukryong, a black dragon. The word “Man-ri” is an old term for a unit of length, equivalent to about 22,000 kilometers, an enormous distance that reminds us of the will and sweat of Jeju ancestors.

A huge human heritage 'Jeju Batdam'

In addition to its agricultural function, the Batdam creates an outstanding cultural landscape. It also has social and cultural values, such as the pioneering spirit of the Jeju people and a symbol of coexistence with nature. It is also emerging as a theme of rural tourism. As a huge human heritage that is second only to natural heritage, the sustainability of agriculture must be guaranteed, and these ways need to be preserved as a treasure that embodies Jeju culture.

Efforts to Protect and Nurture

With the designation of national and globally agricultural heritage sites, various efforts are under way to preserve and utilize the Jeju Batdam. Various activities are being carried out, such as designating management districts, creating theme parks, operating academies, holding Batdam festivals, creating Batdam villages, and developing Batdam products.

*The Jeju Batdam did not fall from the sky.
We made them by hand, stone by stone. Like a thousand years gone by,
we will be together eternally, with such glistening drops of sweat.*

Meaning of Haenyeo Fisheries

Jeju 'Haenyeo Fisheries' was listed on the Globally Important Agricultural Heritage List (GIAHS) in November 2023. Haenyeo fishing is a unique traditional system in which haenyeo women dive into the sea without breathing devices to collect useful marine products such as abalone, conch, and seaweed. In particular, multi-dimensional knowledge and technology for understanding the sea topography by diving underwater and finding and collecting habitats for aquatic life are important strategic actions for haenyeo fishing. Jeju haenyeo fishing work has been handed down, and is designated as National Important Fisheries Heritage (KIFHS) No. 1. In addition, the Jeju haenyeo were registered as GIAHS in November 2023 in recognition of their ecological sustainability and community value.

History of the Haenyeo

The historical records of the Jeju haenyeo were recorded in the 28th year of King Sukjong (1702). In the Annals of the Joseon Dynasty, it is recorded as jamnyeo, and in the Annals of the Joseon Dynasty in the 40th year of King Sukjong (1714), it is recorded as haenyeo. As of 2024, the total number of Jeju haenyeo was 2,623, down 27.4% from 3,613 in 2020 and down 7.6% from 2,839 in 2023. By age, 1,594 women aged 70 or older accounted for 60.8%, 758 aged 60 to 69, 28.9%, 144 aged 50 to 59 years old, 5.5%, and 121 aged 30 to 49 years old, accounting for 4.6%. Jeju haenyeo are on continuous decline, and the small number of haenyeo under the age of 30 has stayed about the same.

Haenyeo Culture

Haenyeo culture refers to tangible and intangible cultural heritages that have arisen from life along with the work of haenyeo. It is defined to include najam techniques, fish folk knowledge, faith, songs, work tools and clothing, and community customs. Haenyeo cultural resources are divided into tangible and intangible cultural resources, tangible cultural resources are divided into bulteok, haesindang, haenyeo clothes, or work tools, while intangible cultural resources include haenyeo gut (spiritual rituals), haenyeo songs, and haenyeo legends.

Haenyeo Cultural Resources

		Tangible Cultural Assets			Intangible Cultural Assets			
Total	SUM	Haenyeo Bulteok	Haenyeo Sea God Shrines	Haenyeo garb and work tools	SUM	Ceremonial occasions	Songs	Folktales
219	175	48 Jeju 29 Seogwipo 19	107 Jeju 59 Seogwipo 48	20 Mulsojungi Tewak Mamangsar	44	35 Traditional Haenyeo Ceremonies	1 Haenyeo Song	8 Legends of Haenyeo

- **Bulteok:** a place where haenyeo prepare work or take a break
- **Haesindang:** In each seaside fishing village on Jeju Island, there is at least one haesindang, a place where fishermen and haenyeo living with the sea as their living ground. Haesindang refers to a shrine for the seaside village.
- **Jamsu-gut and yongwang-gut:** A ritual place to pray for the safety and abundance of haenyeo is located in the haesindang, located near where the jamsu-gut and yongwang-gut are held, and for jamsu-gut and yongwang-gut, the haenyeo pays for the sacrifice preparation and gut ritual. It shows that livelihood and ritual become one.
- **Haenyeo songs:** songs sung mainly while rowing or sculling a boat to islands such as Biyangdo and Jigwido or while returning to the mainland, or while carrying a tewak and doing fishing work or swimming.
- **Haenyeo Legends:** There are many tales related to Jeju haenyeo, such as 'Jinju Halmang', 'Coral Haenyeo', 'Manhaengi Halmang', 'Yonggung Olle', and 'Jeombok Halmang', and there are also tales related to haesindang, such as the 'Aegipogae Legend'.

Haenyeo Wetsuit (bottom, top, hat)

Haenyeo fishing tools (diving mask, taewak, bitchang)

Major area for haenyeo

The "village fishing grounds" where haenyeo operate refer to the waters licensed pursuant to Article 9 (1) of the Fisheries Act, and the licensed fishing grounds are 7,738 ha in Jeju City and 6,693ha in Seogwipo City, a total of 14,431 ha. The haenyeo belong to the Jejusi Suhyup, Hallim Suhyup, Moseulpo Suhyup, Seogwipo Suhyup, Seongsanpo Suhyup, and Chuja-do Suhyup, and they belong to the fishing village fishing community under the jurisdiction of the Suhyup (National Federation of Fisheries Cooperatives).
